

The Redi-Rock logo is a red square with the words "REDI+ROCK" in white, bold, sans-serif capital letters. The plus sign is a simple horizontal line.A large, curved retaining wall made of stacked, rectangular stone blocks with a weathered, textured surface. The wall is set against a backdrop of a grassy field and a cloudy sky.

Created from architectural-grade, wetcast concrete, Kingstone blocks provide an aesthetically pleasing and structurally sound solution.

REDI-ROCK TEXTURE:

# KINGSTONE

A close-up photograph of several stacked stone blocks, showing their weathered texture and irregular shapes. The blocks are light brown and tan in color.

Striking a balance between the grandiose scale of Limestone and rugged relief of Ledgestone, the Kingstone texture appears weathered by water and time like the crown of a natural stone outcropping. With each Redi-Rock block looking like a large, quarried stone, Kingstone will transform retaining walls into castle-worthy walls.

A photograph of a stone retaining wall in a grassy field. The wall is made of large, rectangular stone blocks with a weathered texture. The background shows a blue sky with white clouds.

## Kingstone Block Specifications

- 
- A photograph of a stone retaining wall in a grassy field. The wall is made of large, rectangular stone blocks with a weathered texture. The background shows a blue sky with white clouds.
- Texture developed from weathered limestone rocks
  - Trapezoidal shape allows convex and concave radii
  - 5.75 square feet (0.5 square meters) of face per block
  - 8 unique faces give walls a random aesthetic
  - Approximately 46 square feet (4.3 square meters) of non-repeating texture available
